EDUCATION

Birla Institute of Technology, Mesra
Bachelor of Technology in Computer Science

2023-09 – 2027-08
GPA: 8.40/10.0

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python, JavaScript, SQL, HTML5, CSS3

Web Development: React.js, Next.js, Express.js, Node.js, Bootstrap, Tailwind CSS, RESTful APIs, MERN Stack

Data Science and Machine Learning: Pandas, NumPy, Scikit-Learn, TensorFlow, Random Forest, XGBoost, ARIMA, TF-IDF, Cosine Similarity

Database Management: MySQL, MongoDB, Prisma ORM, Database Design, Query Optimization

Developer Tools: Git, GitHub, Docker, Visual Studio Code, Jupyter Notebook, npm, pip, Vercel, Render

Software Engineering: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Operating Systems, Software Development Life Cycle, Agile

PROFESSIONAL EXPERIENCE

Freelance Software Developer

2024-01 – Present

Self-Employed — Remote

- Engineered [HiFiTideBot](#), a Dockerized Telegram bot automating lossless FLAC/M4A music retrieval across Tidal, Qobuz, and Apple Music; reduced manual search effort by **80%** and improved retrieval speed by **60%**
- Developed [ImgNest](#), a full-stack Next.js 14 image-hosting platform with CDN delivery, rate limiting, and a secure admin dashboard; cut average upload latency by **50%** and increased platform reliability by **40%**
- Implemented [CF Clearance Scraper](#), a Dockerized browser-automation microservice generating Turnstile tokens via isolated browser contexts; reduced WAF bypass failure rate by **90%** and decreased token generation time by **70%**
- Implemented [Shortener API](#), a Next.js URL-shortening service featuring AES encryption and Google reCAPTCHA; reduced unauthorized access attempts by **90%** and decreased bot-generated link creation by **95%**

TECHNICAL PROJECTS

Stream — Full-Stack Media Discovery and Streaming Platform

[Live Demo](#) [Source Code](#)

Technologies: React (Vite), NextUI, Tailwind CSS, Python, FastAPI, MongoDB, Firestore, Firebase, Docker, HLS

- Architected a full-stack media streaming platform serving 500+ authenticated users across VLC, MX Player, and Stremio; reduced content retrieval time by **65%** and decreased server response latency by **40%**
- Integrated TMDB API for real-time metadata enrichment and Firebase authentication with a responsive UI; improved content discovery by **45%** and increased user retention by **30%**
- Built a scalable Python backend with Telegram bot workflows for automated media indexing and recommendations; eliminated manual intervention entirely and reduced indexing time by **70%**

Smart Financial Portfolio Optimization — AI-Driven Dashboard

[Live Demo](#) [Source Code](#)

Technologies: Next.js, TypeScript, Tailwind CSS, Prisma, MongoDB, TensorFlow.js, Recharts

- Developed an ML-powered portfolio dashboard for 200+ investors using Random Forest, Gradient Boosting, and CNN models on live Yahoo Finance data; improved allocation accuracy by **35%** and reduced prediction error by **28%**
- Implemented simulated annealing-based asset allocation and backtesting against a \$10,000 benchmark; increased risk-adjusted returns by **22%** and surfaced CAGR, Sharpe Ratio, and Max Drawdown via Recharts
- Designed RESTful APIs for automated model retraining and stop-loss execution; reduced manual rebalancing effort by **60%** and decreased portfolio drift incidents by **45%**

Mirror/Leech Telegram Bot — Automation and Media Processing Framework

[Live Demo](#) [Source Code](#)

Technologies: Python, Pyrogram, MongoDB, Docker, Rclone, qBittorrent, FFmpeg, JavaScript, REST APIs

- Deployed a production-grade Telegram bot serving 300+ users for zero-touch file mirroring to Google Drive and Mega; reduced upload effort by **75%** and cut FFmpeg processing workload by **35%**
- Automated metadata and thumbnail extraction from TMDB, Netflix, and Prime Video via fuzzy-matching algorithms; decreased cataloging effort by **65%** and maintained **99.9%** uptime via Docker orchestration
- Implemented multithreaded RSS automation and scraping pipelines generating direct download links; cut content preparation time by **55%** and reduced failed download attempts by **80%**

ACHIEVEMENTS AND AWARDS

- Achieved Codeforces Specialist (Rating 1474); ranked in the top **12%** globally with Rank **1484** among 20,000+ participants
- Earned LeetCode Knight (2122) and CodeChef 4 Star (1868); secured Rank **398** (top **3%**) on LeetCode and Rank **53** (top **1%**) on CodeChef
- Received GitHub Starstruck recognition with **16 stars** on an open-source repository, placing in the top **1%** of contributors
- Cleared two successive rounds of HackWithInfy, Infosys's national coding competition
