EDUCATION

BIRLA INSTITUTE OF TECHNOLOGY MESRA, RANCHI <i>B.Tech - Computer Science and Engineering</i>	2023 – 2027 <i>CGPA: 8.2 — Ranchi, Jharkhand</i>
DAV Public School, Gandhinagar <i>Class XII – CBSE</i>	2021 – 2022 <i>Percentage: 82.20% — Ranchi, Jharkhand</i>
DAV Public School, PTPS, Patratu <i>Class X – CBSE</i>	2019 – 2020 <i>Percentage: 94.2% — Ranchi, Jharkhand</i>

Technical Skills

Full-Stack:	MERN — MongoDB, Express.js, React.js, Node.js
Languages:	C, C++, Java, Python, JavaScript, HTML5, CSS3
Databases & Platforms:	MySQL, MongoDB, Render, Vercel, Heroku, VPS, AWS
Tools & Competencies:	VS Code, Git, GitHub, Shell scripting, Linux (basic), SQL, OOPS (C++)
Relevant Coursework	

- Object-Oriented Programming (OOPs)
- Database Management System (DBMS)
- Data Structures (DSA)
- Operating System (OS)

Projects

Mirror Leech Telegram Bot <i>MongoDB, JavaScript, Python, Docker, Rclone, QbitTorrent</i>	GitHub Live
– Built a Telegram bot to automate file mirroring (Google Drive API, Rclone API) to Google Drive, Mega etc., and leeching to Telegram — reducing manual upload effort by ↓70–80%. – Developed an FFmpeg-powered video tools module enabling trimming, merging, and compressing before upload — cutting editing workload by ↓30–40%. – Integrated APIs, multithreading, and scraping to generate direct download links from movie sites (Cinevood, Movies4u, SkyMoviesHD, etc.) — saving ↓50–60% in content preparation time. – Implemented an RSS-based automation pipeline that fetches new movie links on release and triggers downloads automatically — enabling 24/7 unattended leeching. – Added automated poster/video thumbnail scraping from TMDB, Netflix, and Amazon/Prime with FuzzyWuzzy matching and improved thumbnail handling — reducing effort by ↓60–70%. – Designed a custom streaming UI (JavaScript + Telegram indexing) connected to the bot backend for seamless online video streaming and misc tools like OCR, TTS, WebSS, Translate, Pahe, VidSS, Thumb, Convert.	

Stream <i>JavaScript, Tailwind CSS, MongoDB, HTML, Docker</i>	GitHub Live
– Built a Telegram-indexed streaming platform for anime, movies, series, and K-dramas with full lifecycle management (indexing → playback) — reducing content search and setup time by ↓60–70%. – Integrated the TMDB API for rich metadata and thumbnails, and developed a responsive Tailwind UI with category filters and Firebase-secured login, boosting discovery and retention by ↑40–50%. – Enabled multi-platform streaming (Browser, VLC, MX Player, Stremio) with direct downloads and ad-supported or shorteners monetization, expanding accessibility by ↑70–80%.	

ACHIEVEMENTS

- **Codeforces Specialist (Rating 1474)** — Consistently placed within the top **12%** globally, demonstrating reliable problem-solving and algorithmic ability.
- **Codeforces Contest Performance** — Secured **Rank 1484** out of 20,000+ in a Division 2 contest, reflecting steady performance under contest conditions.
- **LeetCode(Rating 2122/Knight) & CodeChef(Rating 1868/4 Star)** — Weekly Contest **Rank 398 (Top 3% among 18k)** on LeetCode and **Rank 53 (Top 1% among 20k)** on CodeChef, highlighting algorithmic efficiency and reliable time management.
- **GitHub Starstruck** — Earned **16 stars** on a repo, placing in the top **1%** of GitHub users for project visibility.
- **CCL Ke Lal Award** — Selected among the top **0.1%** students in Jharkhand for academic excellence.
